

# Join our study on hearing, language, and speech in autism spectrum disorder (ASD)

Is your child between 6-12 years of age with or without ASD?

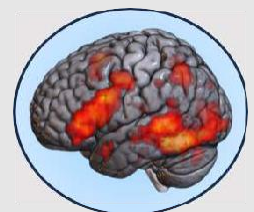

What's involved in the one visit to SickKids?

Hearing assessment

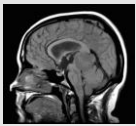

Brief cognitive testing

MEG & MRI

Why participate?

Receive a picture of your child's brain

Summary of hearing and cognitive results

Gift card, lunch voucher, & parking pass

Bring a friend or sibling!

Although there are no direct benefits to you, results may help inform treatments for children with ASD who struggle with language

**Principal Investigator:**

Dr. Darren S. Kadis
